

## KEEP RODENTS OUT WITH RODENTGUARD PRO!

RodentGuard Pro is a comprehensive rodent control program designed to address every stage of rodent management, from thorough inspections to eradication to ongoing protection. Our goal is to ensure a rodent-free environment and provide continuous safeguarding against future infestations.

### KEY FEATURES

#### INSPECTION EXCELLENCE

- Trained experts conduct detailed inspections to identify entry points, nesting sites, and signs of rodent activity.
- Technicians utilize advanced technology for precise detection.

#### ERADICATION SOLUTIONS

- Tailored eradication plans created based on the severity of the infestation.
- Humane and effective trapping methods and using entomomorphically friendly rodenticides, if necessary.

#### CONTINUOUS PROTECTION

- Implement preventative measures to protect the property against rodent re-entry.
- Regular follow-up inspections to monitor and ensure the effectiveness of the eradication process.

#### ENVIRONMENTAL RESPONSIBILITY

- Use eco-friendly products and methods to minimize the impact on the environment.
- Promote sustainable practices in rodent control.

## RAT FACTS

**SIZE** - Adult rats can fit through a hole the size of a quarter.

**WEIGHT** - They have excellent memories. Once they learn a route, they won't forget it.

**NESTING** - Rats can dig up to 100 ft from their hole.

**SOUNDS** - Rats have poor vision but highly developed senses of smell, touch, and hearing.

**JUMPERS** - Rats are excellent jumpers and can leap 36 inches vertically and 66 inches horizontally.

**FEED** - Rats feed every day and can live in very crowded, close quarters if food is available.

**SWIMMING** - Rats can tread water up to 3 days.

**NOCTURNAL** - Rats are nocturnal.

**REPRODUCTION** - Rats can reproduce up to 6 times a year with litters averaging from 4 to 8 pups each.
